

ELECTROFUSION TOOLING

Hy-Ram has been designing and manufacturing Electrofusion Tooling for over 25 years. Good quality pipe preparation, re-rounding and pipe clamping are essential to ensure weld integrity. With recent tooling additions, we now offer a comprehensive range of high quality 'top-end' equipment for most Electrofusion applications.

Electrofusion Re-rounding & Clamping

Re-rounding tools

Re-rounding Tools

A complete range of Re-rounding clamps for PE pipe ranging from 16mm to 630mm diameter. The clamps are designed for use on the pipe prior to electrofusion where ovality is present either due to manufacture or storage.
